

eMag Solutions is a leading Electronic Discovery and Data Management vendor

and a full service provider for data access, restoration, and processing, offering proactive and reactive solutions for litigation, regulatory, and compliance matters.

eMag products and services allow clients to shrink costs, reduce risk, and promote organizational efficiency through enterprise content management. eMag is the first E-Discovery company to achieve the ISO 27001 information security certification for its worldwide data processing facilities.

eMag has 3 worldwide service labs with the resources and infrastructure to provide electronic evidence extraction, data restoration and analysis for any task no matter the complexity or size.

Along with its state-of-the-art facilities, eMag also has the capability to bring its services onsite, anywhere, at the request of the client, to accommodate local nations' data privacy issues. eMag provides services covering the United States, Europe, Middle East, Africa [EMEA], and Asia.

Core Service Offerings

ELECTRONIC DISCOVERY

eMag Solutions offers a full range of electronic discovery processing, including E-Mail extraction, de-duplication, date filtering, keyword searching, near-duplicate identification, custodial targeting, native file delivery, full TIFF processing, load file creation for native reviews for hosting, multiple platforms for load files, and exception reporting for electronic discovery processing.

ELECTRONIC DISCOVERY PREPAREDNESS [EDP] CONSULTING

eMag offers EDP for companies, law firms, and other business entities to ensure compliance with rules and regulations governing Electronically Stored Information [ESI] discovery and retention policies.

DATA RESTORATION

eMag specializes in non-native tape restoration of files from storage media, regardless of the format in which it is stored, ensuring complete restoration of 100% of data, which saves clients time and money.

COMPUTER FORENSICS

eMag offers a highly exhaustive consultative approach to computer forensic analysis in order to help clients recover, convert, review, and present the findings of a forensic investigation.

DATA RECOVERY

eMag provides tape, optical, and hard drive data recovery services to help clients get their data back.

E-MAIL PROCESSING SERVER PRODUCTION / CONVERSION / ARCHIVING

No electronic discovery company is capable of handling more E-Mail formats than eMag Solutions. eMag services include E-Mail and Server Production, E-Mail Conversion and E-Mail Archiving. eMag's messaging system experts are capable of producing E-Mail Messages from nearly any E-Mail system, even those containing foreign scripts, such as Cyrillic

eMag Knowledge

eMag Solutions is a proven expert in format conversions of complex, unpublished backup media. eMag provides expertise to manage backup catalogs and architect solutions to restore, process, sort and search E-Mail.

World Class Software

eMag's world class software allows clients to address data restoration, data warehousing and backup systems, as well as copy and encryption software for secure transportation of data offsite.

Using eMag's electronic discovery software allows clients to rapidly identify relevant content for litigation, investigations and regulatory response projects, thereby preserving valuable time and money for case strategy and preparation.

eMag PreVu

eMag's hosted data portal allows organizations to view, pre-cull, search & filter raw data. PreVu allows users to create early stage processing requests to facilitate e-discovery, litigation planning, or enterprise content management.

eMag Proprietary Software

eMag offers fully scalable, portable technology solutions to provide worldwide service in eMag office locations or onsite at the client's facility.
